HOW IT WORKS

1

Speak

Talk naturally for twenty seconds. No script, no device, no setup.

2

Read

We analyze how you speak, not what you say, and return a clear read on your day.

3

Track

See your baseline over time and get a nudge when something shifts.

YOUR DAILY READ

Green, blue and red mean exactly what they say.

Steady, worth watching, or time to check in. Every score pairs a color with a word so nobody has to guess.

Twenty seconds of speech gives a read on how you are doing.
